IN THE CLAIMS:

Cancel claims 1-10 and add claims 11-48:

11. (new) A cyclosporin produced by a process which comprises purifying on a large scale a product from a feedstock containing one or more impurities having closely-related physical properties to the product, which process comprises feeding the feedstock into an extraction column under conditions adapted for separating more- or less-polar impurities from the feedstock, wherein a lighter phase flows counter to a heavier phase, thereby forming an output in one phase containing the product containing less more- or less-polar impurities so that the output contains the product in a substantially purified form,
